## Premier Receives a Prestigious T-Mobile Award for Finding a Missing Student Using a CPR<sup>3</sup>

The Premier team used the CPR<sup>3</sup> management portal to pinpoint and provide the device's last known location, which allowed police to locate the child.

Houston, TX – T-Mobile awarded Premier Wireless Business Technology Solutions with its Community Champion award after a CPR<sup>3</sup> device was used to locate an absent 5-year-old Wichita, Kansas, Elementary School student.

The child had been absent from school for three weeks. The school district had given her father a CPR<sup>3</sup> device as part of its initiative to stay connected to vulnerable students.

Staff tried several times to call the father's CPR<sup>3</sup> but never received an answer. Finally, they went to the child's last known address, but when she was not there, they became extremely worried and called Premier Wireless for help.

The Premier team was able to use the CPR<sup>3</sup> management portal to pinpoint and provide the device's last known location. Police went to the address, found the father and child, and took them to a shelter.

The award recognizes the difference Premier Wireless is making in communities around the country.

"We were very excited to learn that the CPR<sup>3</sup> platform was instrumental in keeping a child safe. We are so proud to be able to partner with Lea Bogle and everyone at Premier Wireless to support their
