

CPR³ Refugees Battle Card

Solution Overview

The CPR³ solution is a fully managed purpose-driven data device that includes voice activation. The CPR³ is custom-built for organizations to provide access to key resources at the tap of an icon. The CPR³ software allows program administrators to remotely add, update, or remove apps for community programs, health, nutrition, housing, and other resources. The core of this solution is a smart phone outfitted with a rugged case and screen protector that provides unlimited communication and unlimited internet access for refugees. The CPR³ is a turn-key solution that includes white glove setup and ongoing support.

Solution Benefit

Refugees coming to America face daily challenges to find basic needs like food and shelter, healthcare and more. Without internet access, text, voicecall or email, the refugee population struggles to connect with the resources they desperately need. Providing smart devices enables them to contact loved ones, potential employers, and community organizers. Premier's CPR³ solution includes a purpose-driven device customized to give refugees access to critical resources. The CPR³ empowers refugees to connect anywhere from their fingertips as well as access resources for food, housing, health, education, employment, and more with America's largest and fastest 5G network by T-Mobile.

Qualifying Questions

- What are the ways your community or organization supports refugees?
- What are your biggest challenges in supporting new refugees?
- How do your refugees access key resources today?
- How do you keep your clients updated with newly available resources?
- How does digital access or work experience affect employment in your area?

Why Do We Win?
