

# Connected Fire Truck

## First Responder Resources

**MDT/Laptop  
Rugged or Semi-Rugged**  
to log response times, delays,  
view building diagrams, or  
HAZMAT information in the area.

**Cloud Management**  
remotely manages, configures,  
monitors, and updates systems  
without a “truck roll.”

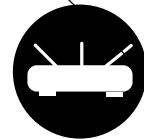

**High-Gain, All-in-One Cellular,  
WiFi, and/or GPS Antenna**  
receives and sends an  
excellent signal.

**Wireless Rugged or  
Semi-Rugged Tablet**  
to access vital information,  
updates and take digital  
photos from scenes.

**Connected  
Devices & Sensors**  
provide information and  
trigger events in real-time.

**Cellular Router**  
provides rugged and  
reliable in-and-around the  
vehicle connectivity with  
available redundancy.
