

SMART LIBRARY

The Purpose-Driven Devices
for Your Community

Public libraries serve as critical infrastructure for bridging digital divides, empowering lifelong learning, and advancing economic recovery.

What We Know

Studies show that 142 million Americans need reliable high-speed internet at home. Libraries are called upon to make technology more accessible for every person of every age in their communities, including students, job seekers, and the millions of Americans who still lack broadband access and skills.

Libraries have become a vital link between the public and internet connectivity; providing people with resources the internet offers.

Premier's CPR³ Program Overview - Meeting Your Community's Connectivity Needs

CPR³ connects your patrons to resources, combining the functionality of a traditional hotspot with the ability to access the internet without requiring a secondary device. This all-in-one customizable unique solution provides connectivity, access to critical resources, and a Chrome browser on your platform of choice adding

Specialized CPR³ Solutions

SilverSpots: CPR³ for Seniors

SilverSpot is designed to meet the unique needs of elderly adults; this purpose-driven device combines ease of use with a comprehensive and accessible platform to provide access to a wealth of resources that address the unique needs of our elders. SilverSpot delivers an all-in-one solution for seniors.

Premier's White Glove Service

All devices come custom pre-packaged & labeled for easy check-in & check-out

TotSpots: CPR³ for Tots

TotSpot is designed to meet primary learners' unique developmental and educational needs; this purpose-driven solution helps build digital skills for toddlers and preschoolers. The touch screen allows children to trace numbers and letters. The Totspot is also easy for young children to carry and use, and it can be pre-loaded with parental apps to connect parents to resources.

Key Features of all CPR³ Solutions:

- Hotspot functionality & internet connectivity
- Preconfigured tailored apps & resources
- Chrome browser for online access
- Easy-to-use interface and a how-to video
- Unlimited data on each device (up to 8 devices)
- Rugged case & screen protector
- Customized library logo
- Software solution management portal to add or update apps & restrict access as needed
- Solution deployment & support
- Check-in & check-out labeling & packaging
- Optional CIPA content filtering

Traditional Library Connectivity Solutions

Chromebooks & Laptops

Cloud-connected computer alternatives open new opportunities for every patron. Additionally, Chromebooks and laptops are available with or without built-in 4G LTE connectivity for wi-fi access.

Hotspots

A hotspot at its core provides internet connectivity via a cellular network connection and provides library patrons who lack service the ability to access the internet.

Hotspot Key Features:

- MDM for easy management
- Interactive dashboards for IT admins
- Content filtering upon request
- Data usage reporting
- Custom packaging

Why Smart Library?

CPR³, TotSpot, SilverSpot, Chromebooks & Laptops, and Hotspots are purpose-driven solutions that provide comfort, ease of use, and increased engagement that bridges the digital divide and provides the essential connectivity that your community needs.
