

Premier 5G Network-in-a-Box

Connectivity on the Spot

How do you stay connected? Whether it is a Friday night football game, natural disaster, weather event, or act of violence, we offer the right portable network solution. **Premier's 5G Network-in-a-Box** communication kit provides internet connectivity to ensure uninterrupted and operational continuity, and enhances safety.

Accessing information affects your ability to do your work: to communicate, protect, and provide safety when needed. The **5G Network-in-a-Box** provides on-the-spot connectivity and maintains an uninterrupted connection and communication, offering data-driven decisions: and providing availability, timeliness, and accuracy. The **5G Network-in-a-Box** can be ready to go within one minute; simply open the box, turn it on, and open the vents. You are ready to go!

Let's break it down for you!

Premier Go-Kit

The **5G Mobile Network** can be custom-built to meet your specific needs. As shown above, it can create a Wide Area Network (WAN) that hosts over 100 connections simultaneously. The **5G Mobile Network** is scalable to expand your WAN and accommodate over 500+ connections. Additionally, it can be built to include an MDT, phones, and more.

Premier's Go-Kit is the perfect companion to reinforce communication continuity during a critical incident by providing you with preprogrammed and active phones, tablets, or hotspots; ready for immediate distribution to your emergency response team.
