PREMIER WIRELESS™

CLOUD-BASED DEVICE MANAGEMENT

Inseego Connect™

MSRP: $39.99 - $254.99

Deployment, remote management and monitoring simplified

Inseego Connect is the new cloud-based configuration and monitoring application provided by Inseego. Customers can remotely monitor device health and status with powerful dashboards and insightful diagnostics.

View & Configure Device Inventory
Remotely configure device settings, centralize device information, and pinpoint asset location.

Analytics & Dashboards
Supervise your deployment with informative dashboards and identify rogue users who are consuming excessive data.

Predict Data Usage
Set data usage thresholds, alerts, and notifications to avoid overage fees. Monitor data usage on pooled data plans.

GPS-Based Location Services
Track current and historical device location. Find lost equipment and receive alerts of theft.

Monitor Health & Performance
Analyze key health metrics like signal strength and temperature readings. Troubleshoot inconsistent connections and generate critical alerts.

Mobile Support
Monitor and manage your devices while on-the-go. Support for professional and self installation of Inseego 5G devices.
