

SOTER TECHNOLOGIES

FLYsense® 286C

The World's First Mobile Vape Detector

Overview

Soter Technologies' real-time mobile vape detector is designed to improve the detection and deterrence of vaping incidents in your organization. Leveraging advanced technology, and data analysis, FlySense® 286C offers invaluable insight to allow you to effectively monitor your environment.

- Monitor multiple locations simultaneously in areas where cameras and microphones are not permitted.
- Receive alerts instantly via text and/or email when vaping and tampering instances are detected.
- Advance analytics help identify patterns of vaping and/or sound activity.

Our Mission

We are committed to helping you overcome the challenges presented by vaping. With Flysense® 286C, our measurement of success relies on seamless implementation and complete customer satisfaction.

FlySense® is a registered trademark of Soter Technologies, Inc. FlySense® vape detector is protected by granted and pending patents and design registrations: <https://www.sotertechnologies.com/solutions/flysense/#patents>

Technical Specifications

LED Indicator

Provides clear and intuitive feedback on its operational status based on the color.

Proximity Sensor

Detects the presence or proximity of objects in its range to alert for tampering.

Sound Sensor

Measures sound level to identify anomalies that may indicate instances of bullying, fighting or vandalism.

Vape Sensor

Detects particulates of vape, THC, nicotine, and other vaping products.

Cellular Connectivity

The FlySense® 286C is compatible with the following carriers: AT&T, T-Mobile, U.S. Cellular, and 1NCE.

Characteristics

Dimensions: 4.75" W x 6.56" L x 2.672" H

Weight: 9 oz.

Operating Temperature: 55°- 95°F (13° - 35°C)

Power Consumption: Built-in 802.3af compliant PoE (over Cat 5e or Cat 6 cable)

Coverage Area: 10' x 10' x 10'

Connectivity: Cellular data connectivity

Warranty: 5-year limited hardware warranty covers defects in workmanship and materials

Features

Vape Detection at your Fingertips

Identifies the presence of vaping or smoking activities in a specific area. FlySense® 286 operates using various technologies to monitor the environment and promptly alert and record instances of vaping.

Aggression Detection

Detects and measures sound anomalies to identify instances of bullying, fighting, and extreme sounds.

Tampering Detection

Alerts authorities and sounds an audible alarm when interference or tampering occurs from an object or person.

Data and Analytics

Web portal with customizable dashboard showing analytical reports to help determine which locations and times of day experience the most activity.

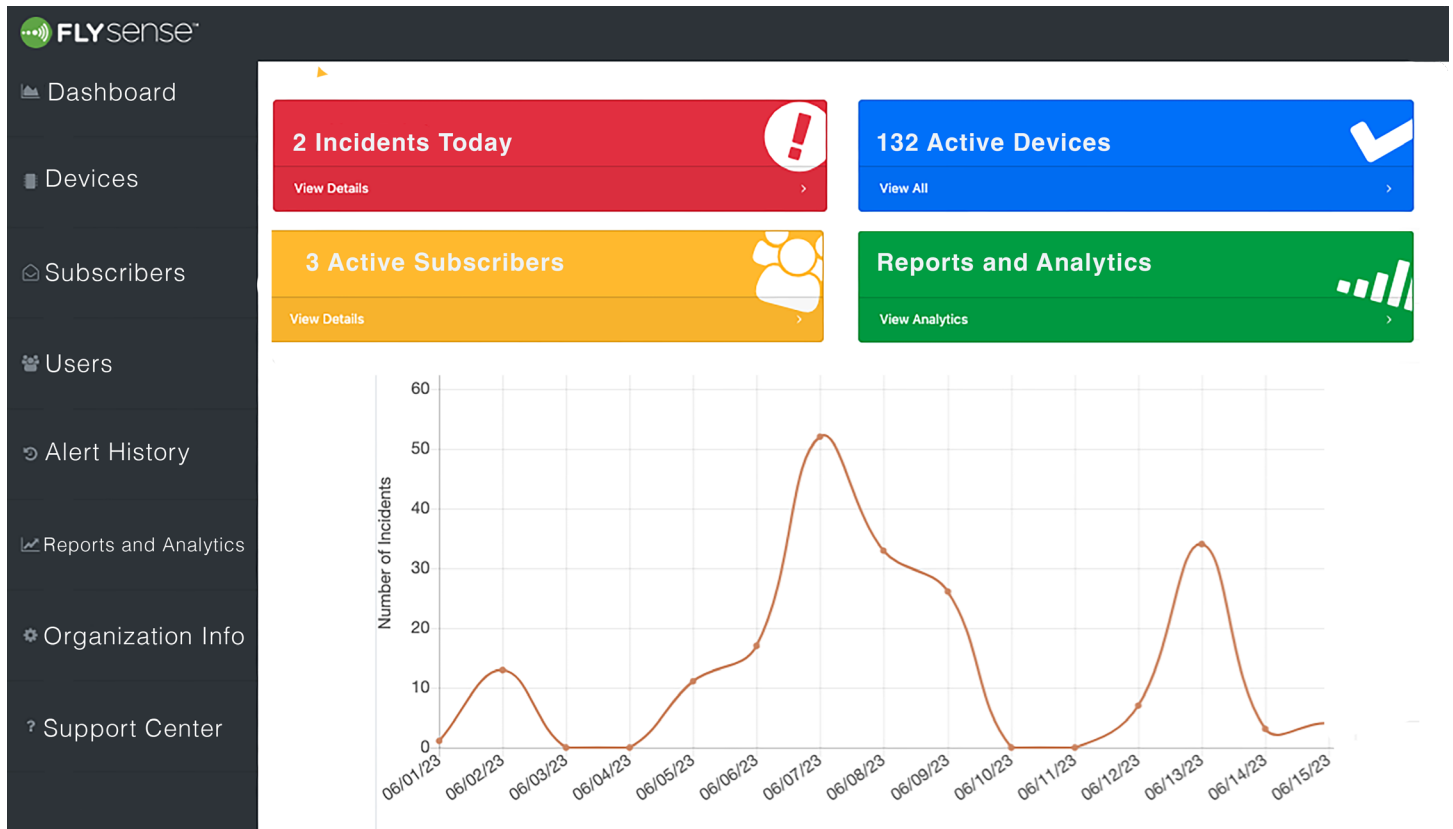

Plug and Play

The use of cellular connectivity ensures that the device will stay off of your network, enhancing the user experience and simplifying the installation process.

Proactive Approach Using Data

Our FlySense® portal allows you to identify and address potential issues before they escalate or become problematic. The combination of technology and innovation provides a sense of preparedness and a focus on prevention.
