# School Emergency Response Solution

Joining forces for fast and reliable emergency response

School communities are facing more safety challenges added stressors than ever before. CrisisGo Panic app and Siyata SD7 rugged mission-critical push-to-talk (MCPTT) device are now integrated, giving teachers and security team instant access to first responders with a single push of a button, alerting all classrooms and every person in seconds.

Together CrisisGo and Siyata have created the next generation panic button that adds emergency specificity and ease of use while transmitting emergency details to all other organizational devices.

While there is a crisis, send a panic alarm with a single push of Siyata SD7 panic button.

Classroom
Desktop alert on classroom PC.

Safety Team

Teacher & Staff

Benefits

EASY ADOPTION

Panic button ready for everyone, no training required for staff.

LEAST MAINTENANCE EFFORT

No network maintenance effort. WIFI and Cellular are both supported.

TRUSTED NETWORK

4G/LTE are always connected for panic alarm sending, do not depend on local campus network.

UBIQUITOUS COVERAGE

Panic alarm is able to trigger whether teachers and staff are on campus, a school bus, a field trip, or at events.

911 & FIRST RESPONDER ESCALATION

Automatic and immediate alert escalation to 911 PSAP and first responders.

SEAMLESS COMMUNICATION

Push-to-Talk is readily available for direct communication among staff, safety teams, and first responders during the response and recovery process.

About CrisisGo

CrisisGo is the leading safety platform & emergency solution, trusted by over 16,000 schools and organizations. With CrisisGo, schools can cover the entire process and workflow required for school safety, integrate the technology needed to streamline safety, and connect the people who make safety happen.

About Siyata Mobile

Siyata Mobile Inc. is a B2B global vendor of next generation Push-To-Talk over Cellular (PoC) devices and cellular booster systems. Its portfolio of in-vehicle and rugged smartphones enable first responders and enterprise workers to instantly communicate, over a nationwide cellular network of choice, to increase situational awareness and save lives.
