

Smart, Simple, Safe: Wearable Panic Button

Enablement for Silent Alert, People Accountability & Emergency Communication

CrisisGo's groundbreaking wearable panic button solution is specifically designed to address the growing safety challenges faced by schools today. Our innovative and cost-effective solution offers scalability to meet the needs and requirements of all school districts.

With the wireless panic button, you can extend your safety plan beyond the confines of the classrooms, ensuring comprehensive protection throughout the entire campus. Simply press the wearable button seven times to trigger an alarm that instantly alerts everyone in the school and establishes a direct connection with first responders and 911 PSAP. Need assistance from the school support team? Just three clicks of the button will activate a call for help.

To minimize false alarms and provide assurance that alerts have been successfully transmitted, the wearable button features an indicator light that flashes red upon confirmation.

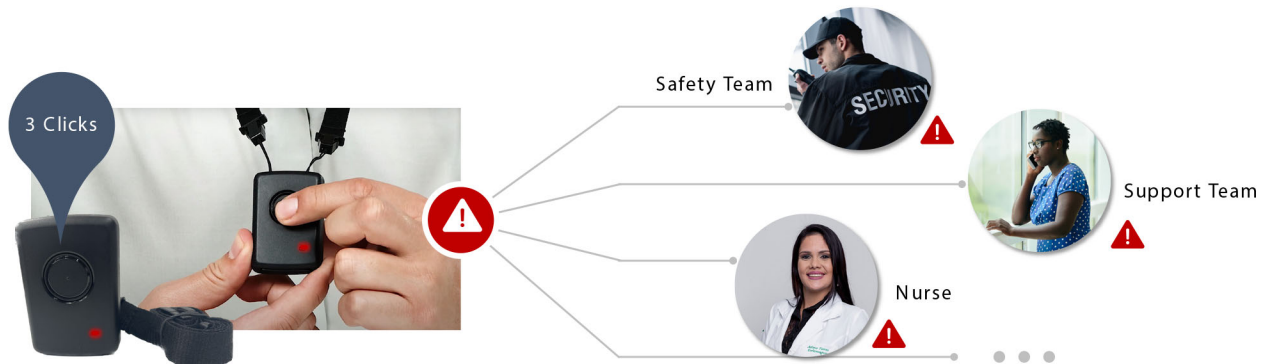

CrisisGo's wearable panic button solution revolutionizes school safety, providing a comprehensive and interconnected system that empowers schools to respond effectively to emergencies and protect the well-being of students and staff.

Use Case

- Trigger the "Lockdown" alert with 7 clicks of the wearable panic button at the moment of a crisis. Instantly alert all staff and teachers and escalate to 911 and first responders.

- Call for assistance from the school support team with 3 clicks of the wearable panic button.

Features

- Trigger school lockdown alert with simple clicks of the wearable button.
- Light flash indicating sent alerts. Reduce false alerts for better efficiency.
- Instant alert delivery to all stakeholders through various channels, including integrated systems such as digital displays, public address (PA) systems, and strobe lights.
- Immediate escalation to 911 and first responders with shared situational awareness.
- With web-based Safety Client embedded in SMS or email notifications, account for students and stay connected with 2-way messaging during an emergency.
- Trigger staff assistance alert to inform support team with simple clicks of the wearable button. Real-time location tracking equipped for immediate support.
- Battery-operated Bluetooth beacons pre-configured based on the property floor plan for precise room location (indoor positioning).
- Built-in GPS services to support precise location tracking indoors and outdoors.
- Easy and flexible integration with other school safety systems.

Benefits

MULTIPLE CHANNELS FOR ALERT DELIVERY

Alerts triggered by the panic button can be received through multiple channels including mobile and desktop apps, email, SMS, voice call, and other integrations like display, PA, strobe, and more. Alert anyone, anywhere in the school within seconds.

PEOPLE ACCOUNTABILITY & 2-WAY MESSAGING

Without using the app, the web-based Safety Client embedded in SMS or email notifications allows staff and teachers to account for students and stay connected with school safety team and first responders.

EXTEND TO COMPREHENSIVE SCHOOL SAFETY SOLUTION

Extend from wearable panic button to CrisisGo's comprehensive school safety solution covering all phases of emergency management, prevention, preparation, response, and recovery. Empower your school in:

- Alerting for any Crisis Types
- Anonymous Tip and Bully Reporting
- Emergency Communication
- Facility and EOP Assessment
- Student Accountability and Reunification
- Threat and Behavior Assessment and Intervention
- Drill Management
- School Safety Compliance

FLEXIBLE INTEGRATIONS

Integrate with more school safety systems such as visitor management, access control, camera, PA, strobe, phones, digital displays, IOT, door lock, gunshot detection, and more to break down silos.

RELIABLE & FUTURE-PROOF NETWORK

With LoRaWAN network, secure future-proof connection in panic buttons for any school monitoring services.

CrisisGo has been leading the K-12 industry since 2013, setting the standard for school safety. Our comprehensive alerting and emergency communications solutions empower schools with real-time alerting, incident management, and parent notification features. CrisisGo also offers comprehensive training to equip staff and teachers with handling emergencies. CrisisGo consistently innovates to enhance K-12 security, partnering with educators and administrators to create safe and nurturing learning environments and redefining school safety for a brighter future in education.
